Introduction

Seoul is constantly reinventing itself.

Even with ten million people in the city and half the country's population in the metro area, Seoul's size may take some time to dawn on you. Even with the constant reinvention, reminders of centuries past are all around in the Joseon-dynasty palaces, Buddhist temples, and *hanok*, the old style of Korean houses. That each of these has been reproduced and reinvented a number of times doesn't take away from their beauty, though one fair critique is that the originals have mostly been replaced by modern recreations.

That re-invention dates back to the end of the Korean 3 Days in Seoul War, a time when the GDP was once that of sub-Saharan Africa. Thanks in part to foreign aid and a dictatorial leader in Park Chung-hee, the economy began to turn around. The 1988 Summer Olympics held in Seoul served as South Korea's 'coming out' party, an opportunity for the world to see the solidly first-world and modern city. Today, the city boasts one of the finest and most comprehensive public transportation systems to whisk you around town or around the country (the Seoul subway system connects to three different provinces and a number of satellite cities).
