

---

Helicopters are different from other types of aircraft. They can take off and land vertically, hover for extended periods of time and move at low airspeeds. This makes them ideally suited for a wide range of tasks Discover Helicopters (Discover Reading Level 4) that cannot be performed by other types of aircraft.

Helicopters can be used for transportation, construction, fire fighting, search and rescue and tourism.

Helicopters are very useful but they are one of the most difficult types of aircraft to fly.

Helicopters are used by the military. This army helicopter has guns for going into enemy territory.

Police departments and other law enforcement agencies use helicopters to pursue suspects. They often coordinate with officers on the ground to report suspects' locations and movements.
