**Topic 1, ABC Hexa Marathon Guide: MCSA/MCSE 70-414: Practice problems on Implementing an Advanced Server Infrastructure exam. Engineers**

---

## Overview

**ABC Engineers is a shipping, manufacturing and distribution company located in Detroit with branch offices in Miami, Toronto, Dallas and New York.**

## Existing Environment Network Infrastructure

**ABC Engineers network consists of a single Active Directory domain named ABC.com. ABC**

**Engineers network contains a File server, DNS servers, DHCP servers, Windows Server Update**

**Services (WSUS), SQL server and servers configured for Failover Clustering.**

**The ABC Engineers branch offices all contain a single DNS and DHCP server. The branch office**

**DHCP servers are configured with a scope for their respective office. All ABC Engineering offices**

**are configured as a single subnet communicating via 1 gigabit per Hexa Marathon Guide: MCSA/MCSE 70-414: Practice problems on Implementing an Advanced Server Infrastructure exam. second network speeds with**

**Hexa Marathon Guide: MCSA/MCSE 70-414: Practice problems on Implementing an Advanced Server Infrastructure exam.**

**VPN connections for connecting offices and Internet access.**

## Current Issues

**Several branch office network users started complaining about poor network transfer speeds when**

---

copying files located on the Detroit office File server. A thorough investigation has determined that

the branch office users experience the poor network transfer speeds during times of peak network

traffic.

### **Planned Changes**

ABC Engineers wants to have all Detroit office and branch office servers replaced with server running Microsoft Windows Server 2012 whilst creating web-based application which access

Customer Relationship Management (CRM) databases and saves sessions to memory of the Web

servers.
