Crash Conspiracy

By Bohdan O. Szuprowicz

This is a fictitious speculation or speculative fiction developed by a visionary author with a very vivid imagination. He is not constrained by professional, political, emotional, religious, moral, and traditional training or practices. On every count, as the saying goes, he thinks “outside of the box”.

The author happens to be an aeronautical engineer and even worked at Boeing at one time. This was about half a century ago when Malaysia Flight 370 Petronas Twin Towers Crash Conspiracy the chief pilot of the company Malaysia Flight 370 Petronas Twin Towers Crash Conspiracy rolled a Boeing 707 prototype during a test flight. He tried to check the integrity of Malaysia Flight 370 Petronas Twin Towers Crash Conspiracy engine attachments to the wings of the plane and he “heard about it” when he landed.

However, the author has no special knowledge of the Boeing 777 airliner, nor any operational details of airline protocols, or accident investigative procedures. As a result he will not bore the readers with any technicalities or product descriptions. Similarly Malaysia Flight 370 Petronas Twin Towers Crash Conspiracy the author will not waste time reciting titles, experiences and specialties of the hordes of experts called upon by the various media to pass judgment on the value and merits of ongoing search activities.
