## **1. Introduction to Sharks**

### **Introduction to sharks**

Fresh water sharks are known to be of some great interest to the aquarium. This is when this fish that appears unusual creates motion in the water through gliding backwards and forwards in its very colorful school. In the introduction to sharks, this article is going to highlight some of the commonly found types of sharks, which are best suitable to rear in the aquarium.

### **Shark catfish with white tip**

This type of catfish has a catlike head, with a sleekly body. It is also considered very mellow, as it is known for eating very much. Shark catfish with white tip can survive in brackish, fresh or salty water. In addition to this, this type of fish enjoys associating in groups besides growing too big. This gives the reasons why they should be kept in tanks of larger sizes, and the Sharks - For Kids - Amazing Animal Books for Young Readers temperature of such tanks be regulated not to go below seventy eight degrees and not to surpass eighty two degrees.

### **The red tailed shark**

This type of sharks prefer either a tube, a cave or a pipe in order to be happy. Sharks - For Kids - Amazing Animal Books for Young Readers Red tails grow up to a size of five inches big, and are always kept in schools. Sharks - For Kids - Amazing Animal Books for Young Readers of not less than six. Sometimes, keeping the alone is not that harmful. These type of fish are always grayish in color with red tails. The recommended water temperature for this fish species should range between 76 to 80 degrees.

---

Red Tailed Shark

### **Rainbow shark**

This type of sharks are also kept either singly, or in a group of more than six per aquarium. This is because of their crankiness nature with the others in case they are reared in a low number. Just like the Red tails, rainbow also requires caves, pipes or tubes in Sharks - For Kids - Amazing Animal Books for Young Readers order to be happy and active. They are rash berry-orange in color on their tails as well as fins. They are sturdy and aggressive. They grow up to a size of nine inches, and survive in the temperature of about eighty degrees.

### **Baal shark**

This type of shark is even tempered in addition to being hyper. They survive in a water temperature of about 72 to 82 degrees. They are silver in color. Their tails and fins are black tipped and they enjoy associating in larger groups.
