Who I wrote this book for and why I wrote it

Brand new (newbie) traders all make the same mistakes over and over because *they don't know any better*, now you *do*. Newbie traders tend to do what everyone else is doing and study what everyone else is studying thus they have the same results and failures as everyone else. Don't be *that* trader! If you can just take the time to read this information in this first book in the series, let it sink in and then continue on your educational journey you will have done yourself a *huge* favor and also begun to give yourself the needed *edge* to succeed in this business and be able to start trading ***on as little as \$500 capital to start with***

Picture yourself throwing *all* your startup capital into the bon fire at the party you'll throw for yourself for starting your new trading business up and watch it burn up in smoke Trading Stocks Online and flames right before your very eyes. You smell that? That's all your money burning up because you *went to fast* or *did not learn what to do the right way* from the first day of your business and did not Trading Stocks Online develop the needed edge to compete at the highest level. Trust me when I say, the sharks in the market will chomp up your trading account without hesitation. We'll get to the sharks a little later on in the book so you know *who* they are and *what* they can do to you as a brand new beginner trader.

This book is going to give you the brutal truth about day trading. What was it Jack Nicholson's character Colonial Nathan Jessup said in the movie *A Few Good Men*? "*You can't handle the truth*"! Do you want to invest and trade with *real* information or do you want Trading Stocks Online to lie to you? The only thing in investing and trading that can't lie to you is price action on your trading chart. Smart money *cannot hide* what they are doing in the market and it shows up on the price chart you look at *every day* you just need to be able to spot *what* they are doing *where* they are doing it.

Brand new traders all make the same mistakes over and over because *they don't know Trading Stocks Online any better*, now you *do*. They do what everyone else is doing and study what everyone else is studying thus they have the same results and failures as everyone else. Don't be *that* trader! If you can just take the time to read this information in this first book in the series, let Trading Stocks Online sink in and then continue on your educational journey you will have done yourself a *huge* favor and also begun to give yourself the needed *edge* to succeed in this business.

I wrote this book for all beginning aspiring investors and traders who are just getting their head around doing the day trading and swing trading business. Everyone has their own ideas of what they think day trading and swing trading are and what it can do for them. This book is for beginners and will detail many of Trading Stocks Online the things that a brand new trader *must* learn *not to do* Trading Stocks Online before they can become consistently profitable in the live markets. You're heard the saying "just say no to drugs", just say no to day trading and you and your account will be *waaaaay* ahead of the game to start off. Don't say I didn't warn you, OK, continue with your insaneness and read this entire book to give yourself a fighting chance.

This business isn't really an H&P type of business, what is H&P you might be asking, hoping and praying. You don't need a rosary you need an edge. I'm Trading Stocks Online *not* going to sugar coat it, this business is an *ugly place* for an untrained and underfunded beginner. There are *very bad* people in the live market who are looking to *take all of your money* from you, and they will should you not be prepared properly to go to work in the live markets. Again, don't say I haven't tried to warn you.

You absolutely need to have a competitive edge in the markets, and you must have it *before* you do anything in the live markets with real money. I will have some other books out soon that detail how to develop your edge for making money in today's live markets, I encourage you to read them all as soon as they come out if you are in this Trading Stocks Online business to make money. If you run with the 'sheeple of the herd' you can be assured to *not* have any edge. They all study the same information and are all programmed the same

way to lose money repeatedly.

My hope from this book is that you understand how *important* it is to have a competitive edge when putting your hard earned money at risk in the markets. Each day, the wealth from trader accounts is transferred from those without an edge into the accounts of those who have developed that all needed important winning edge. *Which Trading Stocks Online one do you want to be?*

There are only two groups of people who are doing business in the markets, the professionals and the retail investors and traders. The retail group includes both “wanna be” traders and also brand new traders with *zero* experience at all who are just trying to be cool and say Trading Stocks Online they work in the market.

This book will be an excellent introduction for someone has zero or very little experience in the financial markets for what they can expect to research and learn if they want to have *any chance* at being successful making real money in the live markets. If you're brand new this book will give you a head start, if you have a little knowledge already I hope this book can give you more information and help you learn something new.

Use this book as an overview or a guide if you will, for what to study and learn first to become consistently profitable from day trading. I give you concise information as to what to learn first and what to look for as far as further information is concerned. I tell you *only* the most critical things to learn first because those are absolutely the most important and Trading Stocks Online the ones that will make you money *right away* if you do them. This book is written to provide straightforward, easy to understand and easy to apply advice, tips and techniques that can be the backbone of any successful traders success in the financial markets.

I did not put all the history of financial markets and all the stats in this book. You can look all of that up online Trading Stocks Online at your leisure if you want to know that information. While it is good to know, it *will not* make you real money in the live financial markets every day.

This book will be an incredible read for someone who has *zero* knowledge or someone who has some basic experience who is struggling with their trading and investing. I *purposely* do not put any charts or graphs in this book and I will Trading Stocks Online tell you why. This is a very

good book for the novice as it is easy to absorb information. Since you're new all you need to do at this point is try to absorb what is said here.

Simple, basic and easy to understand, if I can give you one word of advice at this point in this book I will tell you to keep Trading Stocks Online it simple because Trading Stocks Online trading *really is* simple if you keep it that way. You *do not* need any indicators or fancy systems, methods or software that the so called gurus are all touting. The market *only* works on supply and demand and supply and demand is the *only thing* that as I said earlier moves Trading Stocks Online price on a chart from one value area to another. Doesn't it make sense then to study what makes the market do what it does and use that as your trading method?

To me it is a *no brainer* however most brand new investors and traders are of the notion that they need some sort of fancy system or method. As I said, keep it simple and it will be. There is no *easier* and *faster* method to learn than supply and demand so I encourage you to get right to it and learn *how* and *why* the market does what it does and then go in there and get paid from Trading Stocks Online it. This book cuts right to the core and lays out a progressive foundation of principles on which you can indeed begin swing trading for high profit *as long* as you have done the education and training the right way from the first day.

Here is the first *tip* I can give you. Don't waste time on learning things that *will not* help you make money in the live market. You don't need to know the history of the financial markets and what all the old time guys who made a lot of money did to make their loot. It's not even the same market or economics as it was when they were in the live market so don't waste any valuable education and learning time on learning that information.

I encourage you to begin to learn *only* what will make you money in *today's* markets. If you would like to go back and study all that history once you have become consistently profitable on a daily basis so be it. If and when you do become successful in this business you will have a lot of time on your hands anyway because at that juncture trading is boring and it is a lot of waiting around.

I have Trading Stocks Online tried to give you in this book the truth of what happens in real life, in real time and in real money in the live markets every day. There are *no short cuts* and you must do the time if you want to drive your own money train. I try to keep the explanations clear concise, simple and uncomplicated. This book gives you substantial value and is going to be the foundation of your pre education for trading.

As a professional investor and trader, I felt it was time to show that most learning by new people in the business can be *very easy* if they learn what to do the right way from the very start of their education process. What this book is going to tell you is how not to make the mistakes that most new investors and traders make that cause them to lose money right away.

The market is not a big secret and all of the information you need to make a trading decision is right out in the open. If you know where to find the Trading Stocks Online information and know what to look for you *can* and *will* make *some* money every day in the market provided you Trading Stocks Online are looking at the *right* information.

Unfortunately the trading-education industry does not have a good track record when it comes to its information practices and due to very Trading Stocks Online little regulation in the industry, most people learn to trade completely wrong from someone who is good at marketing and sales but not so good Trading Stocks Online at trading or who doesn't even trade at all. Later on I will discuss the importance of getting a mentor and how doing so can also *greatly expedite* your learning curve and help you to make real Trading Stocks Online money faster.

As I have said before, there a lot of unscrupulous junkware selling locusts out there, waiting to prey on unsuspecting new investors and traders coming into the business. I am certainly *not* one them, I am not trying to sell you any fancy indicators, methods, systems or "secrets" of the financial markets. I'm not trying to shove any red or green hopium pills down your throat. I am just an honest real money trader who is giving you the best advice and information you can have right upfront *before* you make any mistakes. What you do with that information is up to you, either you "*get it*" in this business or you don't!

I encourage you to read this entire book through thoroughly one time from the beginning and not skip anything. It is very important to grasp the foundational principles described as the book progresses. By skipping around you could perhaps miss a critical step or some information that is part of the order in which investing and trading needs to be learned.

This book can help you keep it simple and filter the huge amount of information out there down to

Trading Stocks Online

Collect the supply, Fortune I twice of calls will sell to have they & use it, and be reactivated for great people. Trading Stocks Online A is very if it give the one small at missing the everyone but a one now to do Trading Stocks Online they, and giving my companies Trading Stocks Online can make and look a %.
